Continuation of Substance of Interview including description of the general nature of what was discussed: The Examiner called Mr. Berger to propose an Examiner's amendment for the aforementioned claims. For claim 1, the Examiner proposed having the outer sides that have the stones being twisted instead of just having the stones twisted since a movable setting allowing twisting of the stone will be sufficient to reject the claim. Additionally, the Examiner proposed language for all independent claim clarifying that the twist or spiral formed by the piece of jewelry is provided even when the ends of the jewelry article are not connected instead of having an user twisting the piece of jewelry before connecting the ends in order to provide the twists or spirals. Mr. Berger agreed with these proposals and both parties agreed to make the changes through and Examiner's Amendment in order to place the application in condition for allowance..
